# Instructional Technology Guide

---

IT Services  
UC San Diego

## IT SERVICES

### Educational Technology

## IN THIS GUIDE

### **Instructional Technology Services 2**

Canvas, Zoom, Google Apps, Podcasts, Instructional Video Production, Equipment & Support for Media Assignments, iClickers, Student Computing Labs, Virtual Labs, AWS Educate, Data Science/Machine Learning, Resource Requests, MOOCs

### **Classroom Technology 6**

Hours of Access, Technology Available in General Assignment Classrooms, Specialty Equipment, Connecting to Media Systems and the Wi-Fi Network, Laptop Tips, Wireless Network Access, Shutting Down After Class

### **Classroom Support 8**

Contact, Hours, Before-Class Walkthrough

### **Additional Services 9**

Research IT Facilitation & Integration Support, Media & Recording Support for Events, Audiovisual Systems Design & Installation

IT Services provides technology services, support, and resources for the UC San Diego academic community. Educational Technology Services helps facilitate teaching and learning in service of the University's educational mission, committed to quality, collaboration, customer focus, innovation, and inclusiveness.

This pocket reference guides the use of technology installed in the classroom and includes information about additional instructional resources and services. For details, click the links provided or visit [instructionaltech.ucsd.edu](http://instructionaltech.ucsd.edu).

## INSTRUCTIONAL TECHNOLOGY SERVICES

### CANVAS

Communicate with students, provide course materials, administer assignments and assessments, and track grades on the campus learning management system.

### ZOOM

Zoom, UC San Diego's video and web conferencing tool, is available to all campus faculty, staff, and currently-enrolled students. Zoom allows for video, audio, and screen sharing between participants during live meetings, and meetings can be recorded and shared to support asynchronous instruction.

### GOOGLE APPS

Google Apps for Education provides unlimited file storage and a suite of productivity and collaboration tools.

### PODCASTS

General assignment classrooms are equipped to record your lecture and upload the lecture podcasts for immediate playback through a web browser or playback device. The automated podcast system captures the audio of your lectures, with the option of including slides and visuals from your computer or document camera. 50% of classrooms are also equipped to capture HD video.

## INSTRUCTIONAL TECHNOLOGY CONTINUED

### **INSTRUCTIONAL VIDEO PRODUCTION**

Achieve professional results using video techniques like green screen and the unique Learning Glass recording system. Video editing and captioning services are included. Or produce your own videos at no cost using the award-winning Studio U.

### **EQUIPMENT & SUPPORT FOR VIDEO/MEDIA ASSIGNMENTS**

Provide your students with instruction and access to the cameras and video production equipment they need to complete your course assignments. Media professionals are also available to help instructors integrate video into course assignments.

### **iCLICKER**

Assess student comprehension in the classroom through personal clicker units that allow students to instantly transmit responses to your questions. The no-cost service includes setup help and training.

### **STUDENT COMPUTING LABS**

Find the locations and open hours of campus computer labs and printers.

## INSTRUCTIONAL COMPUTING TECHNOLOGY

### **CLOUDLABS (VIRTUAL COMPUTER LABS)**

Access popular University-licensed software on a personal computer anywhere there is a broadband Internet connection.

### **AWS EDUCATE – EC2 MACHINES**

Campus-supported Amazon Web Services (AWS) cloud computing environment for scheduled coursework, providing students managed access to AWS EC2, Lambda, S3, and many other services.

### **DATA SCIENCE/MACHINE LEARNING PLATFORM: DATAHUB/JUPTYER HUB**

The Data Science/Machine Learning Platform (DSMLP) provides undergraduate and graduate students with access to research-class CPU/GPU resources for coursework, formal independent study, and student projects.

Datahub provides access to the Jupyter web-based interactive programming environment, with support for languages such as Python, R, and Julia.

## COURSE SUPPLEMENT REQUESTS

### ACCESS ADDITIONAL RESOURCES

Submit a Course Information (CInfo) request to supplement your course with computer lab time, access to specialty software, additional data storage, or the use of media in course assignments.

### PROPOSE NEW COURSE TOOLS

All tools available for university-wide use have undergone a security, privacy and suitability review and been approved for use. If a tool you have in mind has not been reviewed yet, help us prioritize our list by letting us know which tools you are interested in using or what types of functionality you need at [edtech@ucsd.edu](mailto:edtech@ucsd.edu).

## MASSIVE OPEN ONLINE COURSES

### UC SAN DIEGO ONLINE

UC San Diego *Online* is UC San Diego's branded instance of Open edX. Open edX is an open source learning management system with a large supportive community. It is the same platform that powers edX.org. UC San Diego Online courses and programs thus provide opportunities to learn from and engage with the campus community for both matriculated and non-matriculated learners worldwide. Instructors who are interested in using UC San Diego Online, or developing fully online courses should contact the Digital Learning Hub at [online@ucsd.edu](mailto:online@ucsd.edu).

## EDTECH SUPPORT

### CONTACT

If you are an instructor or TA experiencing a technical issue, please call our faculty helpline at (858) 822-3315 or email

- [canvas@ucsd.edu](mailto:canvas@ucsd.edu)
- [zoom@ucsd.edu](mailto:zoom@ucsd.edu)
- [kaltura@ucsd.edu](mailto:kaltura@ucsd.edu)

## MULTIMEDIA SUPPORT

### CONTACT

Multimedia Services, part of Educational Technology Services (ETS), can help faculty create course content for use in conjunction with classroom time as part of flipped or hybrid courses as well as fully online courses.

For more information email [multimedia@ucsd.edu](mailto:multimedia@ucsd.edu)

## CLASSROOM TECHNOLOGY

### HOURS OF ACCESS

Classroom equipment is available for use 6:30 a.m. to 11:30 p.m. seven days a week for the duration of each academic term and during finals week.

### TECHNOLOGY AVAILABLE IN GENERAL ASSIGNMENT CLASSROOMS

Media systems are available for instructional use in UC San Diego general assignment classrooms and lecture halls. Available technology can include:

- Cables for Laptop Connection
- Standard VGA/HDMI Video
- Ethernet Computer Audio
- Document Camera for Projection
- iClicker Student Response System Base Receiver (Lecture Halls)
- Multimedia Projector
- Projection Screen/Sound System
- Touchscreen Control Panel
- VHS, Blu-ray, DVD, and/or CD Player with Remote/Wireless Clip-On Microphone
- Assisted Listening Devices (Lecture Halls and Some Classrooms)

The [Classroom Details](#) web page provides information about general assignment classroom media systems and room attributes. Click on a building in the Classrooms tab to highlight it on the campus map. Select a building's classroom to view that room's features. Use the Search tab to find a room with the set of features you need.

## CLASSROOM TECHNOLOGY CONTINUED

### **SPECIALTY EQUIPMENT**

Non-standard and specialty equipment may be ordered for classroom use: multi-standard VHS players and code-free DVD and Blu-ray Disc players (for media from foreign countries), 16 mm and slide projectors, camcorders, video document cameras, and additional microphones. Some equipment and locations may require a technician for operation and fees may apply. Order equipment at [mediaservices.ucsd.edu](http://mediaservices.ucsd.edu) at least three businessdays in advance to ensure availability and avoid late order fees.

### **CONNECTING TO MEDIA SYSTEMS & THE WI-FI NETWORK**

Connect to general assignment classroom media systems and the campus network from a user-provided laptop. Many departments offer laptops for loan to their faculty.

#### **Laptop Tips**

- Always have your AC power supply.
- Carry a device-specific VGA video adapter with you.
- HDMI connections are available in most rooms. Your laptop may require an HDMI adapter.
- Familiarize yourself with your device's monitor resolution and mirroring controls before your first class.

#### **Wireless Network Access**

All classrooms offer wireless internet connectivity. Machine registration is required before connecting to the UC San Diego network. If you're having trouble, call the ITS Service Desk at (858) 536-4357 for assistance.

### **SHUTTING DOWN AFTER CLASS**

1. Conserve energy and reduce expensive projector lamp replacement by using the touchscreen control's System Off option to shut down all systems before you leave.
2. Turn microphone power off and return to the designated drawer
3. Wrap cables and return to wall hooks.

## CLASSROOM SUPPORT

### CONTACT

Email [servicedesk@ucsd.edu](mailto:servicedesk@ucsd.edu) or, for immediate assistance, call (858) 534-5784. Just dial x4-5784 from the campus phone found at the front of every general assignment classroom and lecture hall.

### HOURS

Phone assistance and field support staff are available Fall, Winter, and Spring Quarters.

- 7:45 a.m. to 7:30 p.m. Monday through Thursday
- 7:45 a.m. to 5:30 p.m. Fridays

Arrangements can be made for weekend and holiday support with advance notice. Summer term support hours may vary.

### BEFORE-CLASS WALKTHROUGH

Schedule 15 minutes with a technician before your first class to ensure a smooth first day. Contact Classroom Support to set up an appointment.

## **ADDITIONAL SERVICES**

### **RESEARCH IT FACILITATION & INTEGRATION SUPPORT**

Research Facilitators will help you navigate the complex IT environment for research computing and data (RCD) resources throughout the entire research lifecycle. They can guide you through solutions on campus and beyond for cloud computing, storage and data management for research data, high performance and high throughput computing, high speed networking, and more.

Contact Research IT for hands-on integration support to help you implement your ideas and for proofs-of-concept demos for funding agencies. Facilitator services are provided at no cost to you.

### **MEDIA & RECORDING SUPPORT FOR EVENTS**

Rent sound systems, request an event photographer, set up live video streaming, or record conferences, guest speakers, and other special events for video.

### **AUDIOVISUAL SYSTEMS DESIGN & INSTALLATION**

UC San Diego audiovisual professionals provide design and installation services for department conferences and classroom systems that are made to work for your space.
